Series Ol

Series OI

Reverse osmosis point of use (POU) water cooler. With integrated reverse osmosis filtration design.

Superior quality, made entirely of stainless steel, a 100% recyclable material

Model: M-77OI

Series OI

Integrated reverse osmosis system. Designed for the hardest water types.

The water cooler includes a high capacity filtration system that eliminates suspended solids and microorganisms to ensure the highest quality of pure water. It is recommended to use this filtration system in areas where the municipal water supply is of inferior quality and requires a higher capacity filter. Has the same features as model M77ID, but with an excess water drain from the osmosis filtering system.

Model

M-77OI

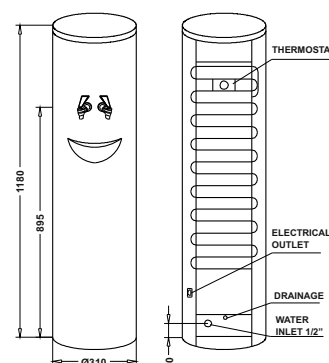

- Cold water tap.
- Room temp. water tap.

INTEGRATED OSMOSIS SYSTEM IN M-77OI

The compact design ensures reliable water flow avoiding the need for multiple connections or loss of water.

- **Four Stage filtration with a pump**
Guarantees higher water quality.
- **Very easy to maintain**
With no possibility of error for the user.
- **High performance and high efficiency**

High water production approx. 250l/day. High rate of input water use: 35%.

Installation drawing

Accessories

FILTERS

Reverse osmosis system made up of three filters and a reverse osmosis membrane, which must all be changed periodically.

CUP DISPENSER (optional)
For easily accessible cups

Technical data

	Series OI
Cooling power (W)	210
Power consumption (W)	100
Voltage 230V 50Hz single-phase (A) (Other options available)	0.5
Continuous cooling capacity (Room T.: 30°C, Input T.: 27°C, Output T.: 17°C) (l/h)	18
Cup filling time (sec.)	4
Cold water output temperature (regulated by thermostat) (°C)	4-11
Refrigerant gas (CFC-free)	R290*
Dimensions (mm). Height x Diameter	1180 x 310
Net weight (kg)	19

* R290 is a natural refrigerant with no ozone impact. It offers high efficiency and reduces energy consumption.

98/83/EC
