SOURCE OF LIFE

Series J

Drinking fountains

Fountain designed for all types of public or private gardens

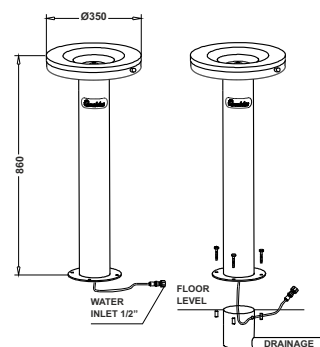

Superior quality, made entirely of stainless steel, a 100% recyclable and highly durable material.

Series J

Specially designed for outdoor use, such as public or private gardens or school grounds.

Highly robust, thanks to the thick stainless steel used in its construction (2mm).

Highly resistant and durable side push button. Room temperature water, without refrigeration unit.

Models

M-2JRO

- Room temperature water jet operated by side push button.

Height: 860 mm.

Model: M-2JRO
