

Pedal Kit

Hands free pedal kit

Allows your Canaletas drinking fountain to be converted to have a pedal

The only manufacturer which offers a personalised solution.

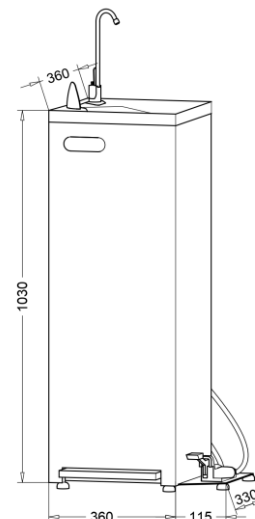

Kit Pedal

Compatible with any Canaletas drinking fountain

To substitute the action of the push button or cup filler with one or two pedals. It comes with detailed step by step instructions to facilitate installation by your maintenance personnel, or if you prefer, an authorized Technical Service can install it. It can be installed on the right or the left, depending on your preference. It is not necessary to screw it to the floor, as it is attached directly to the fountain*. It is designed as a temporary solution, so that the fountain can be returned to its original design at any time.

However, if you are seeking a permanent solution, we recommend the new range of Canaletas HANDS FREE fountains, which like this kit have been developed and are being manufactured in record time.

*freestanding and square designs

Technical features

Professional ground pedal valve. Body, pedal and cartridge made from chrome-plated brass. Body made from a single piece with anti-friction turning system. High resistance pedal with non-slip cover. Instant flow regulation based on the position of the pedal. Removable cartridge with an antiparticle stainless steel filter. Water hammer prevention system with progressive opening.
